

MASTERING THE STID MOBILE ID® SOLUTION

Course ID	STID-ACD-SEC-06
Duration	1/2 day
Format	VILT/ ILT/ OST
Certified Training	Yes
Languages	FR/EN/IT/PL/ES

MASTER SECURE MOBILE IDENTITY WITH STID MOBILE ID®

In a world where mobility and security converge, STid Mobile ID® is revolutionizing access control by transforming smartphones into highly secure virtual identification badges.

This advanced training provides comprehensive expertise in managing the entire lifecycle of virtual credentials, from creation to secure administration, including deployment and integration into your infrastructures.

Through a practical and interactive approach, you will learn to configure, manage, and optimize this innovative solution, ensuring a seamless user experience, full interoperability with existing access control systems, and maximum security levels.

PREREQUISITES

- General knowledge of access control systems and RFID badges.
- Experience in cloud or local platform administration is a plus.
- A smartphone compatible with the STid Mobile ID® application.

AUDIENCE

This training is intended for security and access control professionals, including:

- Installers & Integrators
- Administrators & Security Managers
- Product Managers & System Engineers
- Commercial & Marketing Teams
- Developers & IT Teams

LEARNING OBJECTIVES

Understand the fundamentals of mobile identification and the benefits of the STid Mobile ID® solution.

Manage the full lifecycle of virtual credentials, from creation to revocation, ensuring a secure and efficient process.

Configure and administer the STid Mobile ID® platform, including the badge management portal and integration tools.

Integrate STid Mobile ID® with existing access control systems via dedicated APIs and connectors.

Use STid Setting to configure and optimize STid readers directly from a smartphone.

Customize the STid Mobile ID® mobile app and integrate it into business applications via the mobile SDK.

DETAILED COURSE OUTLINE

INTRODUCTION TO STID MOBILE ID®

- Creation and issuance of mobile badges.
- Access rights management and security policy configuration.
- Revocation and renewal process of virtual credentials.

MODULE 1: LIFECYCLE OF VIRTUAL CREDENTIALS

- Creation and issuance of mobile badges.
- Access rights management and security policy configuration.
- Revocation and renewal process of virtual credentials.

MODULE 2: CONFIGURATION AND ADMINISTRATION OF STID MOBILE ID® SOLUTION

- Configuration of the STid Mobile ID® Portal and user account management.
- Security management and sub-account handling for resellers and large enterprises.
- Online and offline management with SECard.

MODULE 3: INTEGRATION WITH ACCESS CONTROL SYSTEMS

- Interface with access control software via API Web and connectors.
- Direct management of credentials from the access control system.
- Migration strategies and compatibility with existing readers.

MODULE 4: USING STID SETTING FOR READER CONFIGURATION

- Introduction and installation of STid Setting.
- Secure backup and loading of configuration badges.
- Adjustment of reading distances and identification modes.
- Display and retrieval of reader configuration information.

MODULE 5: BEST PRACTICES FOR DEPLOYMENT AND LONG-TERM MANAGEMENT

- Ensuring STid system scalability and future-proofing installations.
- Risk assessment and mitigation strategies in STid access control environments.
- Training internal teams for sustainable technical independence in STid product deployment.

MODULE 6: QUESTIONS & ANSWERS

- Open discussion to address specific questions from participants.
- Clarifications on STid product features, configurations, and best practices.
- Real-world scenarios and solutions shared by STid experts.
- Additional guidance for unique implementation challenges.

CERTIFICATION

Certificate of Completion awarded upon successful completion.

LEARNING FORMAT

ILT (Instructor-Led Training) :

Experience hands-on training at STid's headquarters, led by experts in a fully equipped environment. Benefit from live demonstrations, interactive exercises, and direct engagement with STid specialists for an optimal learning experience.

VILT (Virtual Instructor-Led Training) :

Join a real-time, interactive training session from anywhere. Delivered via video conferencing, VILT provides expert-led instruction, practical exercises, and live Q&A, ensuring the same high-quality.

OST (On-Site Client Training) :

Tailored training delivered at your site, adapted to your infrastructure, security needs, and equipment for a fully personalized learning experience.
