Make your access control instinctive

SECURITY SALES & INTEGRATION - April 2019

[Make your access control instinctive](#)

STid Mobile ID® turns your smartphone into a virtual access credential you have with you at all times, alongside or instead of traditional RFID cards. With the freedom to choose your favorite hands-free, long range or proximity identification mode, make your access options both secure and much more instinctive. The Offline and Online architectures enable you to remain autonomous and independent in access rights management.
